Dear Mr. J.R.

Through this I inform you that now we are living in an atmosphere of terror and threaten, both in East Timor and in Indonesia. Since the massacre on 12th Nov. in St. Cruz, the military authorities continue to pressure the Timorese activists for Independence through constant threaten and terror; even they band further demonstration in East Timor.
Although we live in such an atmosphere, it does not reduce our spirit to give up in fighting this shameful occupation, because our nation requires so and our defenceless people urges so.
The clandestine organization, both in East Timor and in Indonesia is badly harmed. In East Timor the leader of Executive Commite of Clandestine organization, Mr. C.P. (Terus) is searched to be arrested. In Indonesia, as the consequence of the demonstration, seventy students were arrested. They were arrested while they launched the demonstration in UN's, Japonese, and Australian embassy. Soon or thereafter the demonstration in Jakarta, six students were arrested, including the students' leader, L.S, of Clandestine organization in Dempasar, Bali and in Jakarta, the students who did not join directly the demonstration were searched including me.
The students who launched the demonstration in Jakarta are the representatives of the Timorese students in all almost the big cities in Java and Bali. Their names are attached. Forty nine of them has been released and 21 are still remain in jail. These 21 students are going to be brought for trial without stipulating the fix time.
According to ~~the~~ our source of information, among the six

students who were arrested in Dempasar Bali, four of them were sent to East Timor and probably they will be executed together with other prisoners in Dili.

Here in Jakarta, I constantly contact with some of the embassies to inform them about the real situation of our country so that the distortion of information about our strugle by Indonesian Government can be straitened.

I would like to take this opportunity to remind you that the threaten of the Commander in Chief of ABRI, Mr. Try Soetrisno is going to be evident, if the international community get loose the pressure on Indonesian Government. As a consequence, our resistance are going to be faced to a serious problem.

I cannot make a conjecture to assure you but based on my experiences during sixteen years I can say that many Timorese will be extradicted and desapear.

I hope and we hope that the world can open its eyes to see our blood and our tears, that the world can hear our defenceless people's voice of tormentation and mourn through you and that they can comment and react against the barbaric attitude of Indonesian authorities over our people, during sixteen years.

That is all that I can inform you and thank you.

HAPPY Christmas & happy New Year 1992.

Yours sincerely

(Dorlhes Viany Fitto)
